

Запрос цен на английском: 330 строк, по которым цены нет

Первая страница — для владельца, дальше идёт сам запрос, готовый к отправке. Смысл документа в одном: русские наименования этого листа заявки — машинный перевод с английского, и обратный перевод не ищется ни в одном каталоге. Английский оригинал восстановлен, поэтому спрашивать можно на языке продавца.

строк в запросе	330	из 1 342 строк заявки, где цены продавца нет вовсе
штук за ними	8 346	количество взято из заявки, не пересчитывалось
крупнейшие группы	15	крепёж 81 · прокладки и уплотнения 63 · электрика и автоматика 54 · клапаны и арматура 31
изготовитель	1	Siemens

Чего в документе нет и почему. Ни одной цены: это запрос, а не оферта. Ни одной оценки: оценку в запросе печатать нельзя — продавец подстроится под неё. Английские наименования взяты из восстановленного первоисточника заявки и не переписывались: если в оригинале «RESISTANCE TEMPERATURE TRANSMITTER», в запрос идёт именно это, а не обратный перевод русской строки «сопротивление датчика температуры».

Собирает gt/tools/rfq_en.py из gt/data/ship_lukoil.json и gt/data/ship_english_source.json.

Request for quotation

Dear Sirs, please quote the items listed below. The part numbers are the customer's own numbers as they appear in the specification; descriptions are given as printed in the original English parts list.

Please state for every line:

- 1. **Unit price and total price** — for the full quantity stated, not for one piece
- 2. **Confirmed stock as a number** — how many pieces you hold today, not «in stock»
- 3. **Lead time for the full quantity** — counted from order, split by batches if needed
- 4. **Validity of the quotation** — date until which the price holds
- 5. **Incoterms and place of delivery**
- 6. **Origin of goods and HS code** — country of manufacture, not of shipment
- 7. **Original or equivalent** — state clearly if the item offered is not OEM-original, and give its own part number and maker
- 8. **Net weight and dimensions per item** — needed for freight, not for the price
- 9. **Return conditions** — whether the item is returnable and non-cancelable

Two notes that save a round of e-mails. If an item is not available, write «no» against that line rather than omitting it: a missing line is read here as «not answered». If you can offer an equivalent instead of the original, quote both and mark which is which — an equivalent is acceptable only when its own part number and maker are stated.
