Brief description of the item: Automatic positioning according to the cathode harvesting schedule; removal/installation of cell hoods; harvesting of 1/3 of the mother plates at a time with a hold for drainage; stainless steel 316L; infrared sensors for detection of short circuits in the cells. Technical requirements are given in Annex 1 to this request.

Please include in your quotation:

1. budget price, quoted separately on EXW (manufacturer's works) and DDP project site in north-west Russia terms (Incoterms 2020), stating the currency and the validity period of the offer;
2. manufacturing lead time and estimated delivery time (in weeks from the date of order / advance payment);
3. overall dimensions and weights of one equipment unit and of the largest shipping blocks (for logistics assessment);
4. reference list of similar supplies: product, process medium and parameters, year of supply, country;
5. materials of parts in contact with the process medium, and the scope of supply (instrumentation, spare parts, documentation);
6. utility consumption and installation requirements (if available).

This is a budgetary enquiry at the Basic Engineering (FEED) stage: it does not constitute an offer and creates no obligations for either party; detailed technical data sheets will be issued at the next project stage.

Reply deadline: we kindly ask you to submit your quotation within 3 (three) weeks from receipt of this request to stepan@kvantpro.com. Please confirm receipt of this request.
